

VelocityEHS HELPS GLOBAL TECHNOLOGY LEADER IMPROVE ACCOUNTABILITY

“Now, nobody says, ‘Wait a minute, why didn’t that get done?’ Now, it gets done. This has made a big difference.”

Carl Vass

Senior Safety Health and Environment Manager
Cobham

Cobham

- Global leader in communications, electronics, and aviation
- Over 12,000 employees on five continents
- VelocityEHS customer since 2015

Cobham PLC (Cobham) is a leading technology and services innovator, with a global reputation for providing solutions that include satellite communications, defense electronics, air-to-air refueling, aviation services, and wireless technologies. Founded in 1934, it employs more than 12,000 people on five continents.

Cobham’s Davenport, Iowa, facility focuses on aerospace and defense technology. There, the company designs and manufactures everything from refueling systems for airplanes to rebreathers for Navy SEALs. Despite its position at the forefront of multiple leading-edge technologies, Cobham for many years relied on manual systems for the collection of EHS data and incident recording. When he arrived a year ago, Carl Vass — Cobham’s senior safety health and environment manager — knew there was a better way of doing things; he’d seen it firsthand.

“I had used VelocityEHS extensively at my previous employer, and had even traveled

to the VelocityEHS home office in Toronto,” explains Mr. Vass. “I knew what a strong product it was, and what it could do for Cobham. I also knew how it could be customized to fit our needs, and how well it worked. When I came aboard, it was at the top of my list.”

Mr. Vass explains that he was able to quickly make the case that VelocityEHS would bring the efficiencies Cobham needed to streamline its EHS management.

“At the time, Cobham was collecting its EHS data on paper,” says Mr. Vass. “I showed our people how an electronic system would let us do so much more. They understood what the benefits would be right away. They were excited.”

After adopting VelocityEHS, Cobham began to see powerful results almost immediately.

“Boy, it’s worked out real well,” reflects Mr. Vass. “We’ve saved so much in terms of time and follow-up effort. In the past, we might have just put out a sheet internally that said what we did in our audits. The report was sent around physically, but we didn’t have

a system that could ensure it was delivered, and make sure people knew when they had corrective actions to address. Now with VelocityEHS, it’s automatic. We can put the audits in immediately, so they get out faster to people. We can find out if corrective actions got done, and send out reminders. It also has the added benefit of making what we do more visible to our upper management.”

Mr. Vass stresses that Cobham realized particular benefits in terms of this project visibility enhancement.

“The meetings function is great for safety audits, but also for looking at what got done, and what still needs to be done,” explains Mr. Vass. “We have Management meetings every week, and we can keep things out in front of people. That capability had to be done manually before, and things could slip through the cracks. Now, nobody says, ‘Wait a minute, why didn’t that get done?’ Now, it gets done. This has made a big difference. Things stay organized and accountable.”

Asked what advice he would give a new *VelocityEHS* customer, Mr. Vass advises jumping in and becoming familiar with the system.

"Make sure you truly understand the system and what it can do," says Mr. Vass. "Don't be afraid to just go in and play around. That's what I tell people here all the time. You can't break it. Just go use it. It works so well. You'll discover so much!"

Mr. Vass concludes by noting that Cobham's success in Davenport has encouraged it to look at expanding *VelocityEHS* deployment to its other locations.

"We're excited about what this can do for the rest of our organization," says Mr. Vass. "I grew up with different versions of this product. I've really enjoyed it and always thought it did an awful lot. Now other people are seeing that, too. The newest version has been great. It's no longer just an EHS tool. It has so many other uses, as well!"

HELPING LEADING-EDGE TECHNOLOGY COMPANIES BECOME LEADERS IN EHS

VelocityEHS is committed to keeping our customers ahead in the game. Our platform provides the ability to easily track corrective actions, assignments, escalations, and deadlines to ensure critical items are followed through to completion on time. In the twenty-first century, using EHS paper-based systems (or manual spreadsheet programs) to track data is inadequate for companies that want to analyze their information in realtime to identify and address performance issues before they can become a problem.

At *VelocityEHS*, our award-winning software gives users the "total package" for achieving EHS excellence. Find out today why over 12,000 customers already trust *VelocityEHS* to safeguard over 8 million users and help them make the systematic improvements that lead to better management, better performance, and a healthier bottom line.

Benefits of *VelocityEHS*

Simplicity

What makes *VelocityEHS* different? We focus relentlessly on ensuring our software solutions are simple, easy-to-use, and able to solve complex business challenges quickly and capably.

Speed

Not only does our software provide valuable time savings across your organization, our implementations take less time, cost less money, and are more successful than traditional software systems.

Customer Service

Adoption of the *VelocityEHS* Platform is the beginning of a partnership, not the end of a transaction. Our customer advocates stand ready to serve our clients and help provide the simplest and most engaging user experience.

Scalability

Our dynamic solution remains scalable and nimble at every turn, helping you to reach your environmental, health, and safety goals faster and with less struggle. We grow with you!

Value

Our software pricing structure is straightforward, competitive, and encourages organization-wide adoption by eliminating per-user licensing entirely.

Help for You to Do What You Do Better!

The *VelocityEHS* solution eliminates the time-consuming challenge of tackling EHS data manually, and allows you to respond to challenges confidently and effectively. This frees you up to get back to handling the other critical issues that drive business performance and impact your core goals.

"We've saved so much in terms of time and follow-up effort. In the past, we might have just put out a sheet internally that said what we did in our audits. [...] Now with VelocityEHS, it's automatic. We can put the audits in immediately, so they get out faster to people. We can find out if corrective actions got done, and send out reminders. It also has the added benefit of making what we do more visible to our upper management."
