

# DON'T JUST MANAGE CHANGE, MASTER IT

A comprehensive cloud software solution that helps you coordinate workflows, manage processes, and improve the safety and sustainability of your workplace through focused organizational change.

### Core Capabilities

- Workflow Management
- Status Notifications
- Pre & Post Start-Up Checklists
- Audit Trail

### Management of Change Made Easy

Effective management of critical changes and hazardous processes leaves little room for error. Your employees need to know their responsibilities and meet their obligations one hundred percent of the time. Without a clearly defined and organized workflow, you expose your company and your employees to inconsistencies, inefficiency and risk.

The VelocityEHS Management of Change (MOC) product helps streamline operational change within your organization, creates a systematic approach to managing the people and processes involved. Our MOC software provides a seamless, centralized system for defining and scheduling change, designing workflows, managing documents, creating and deploying checklists, tracking approvals, and assigning action items.

The VelocityEHS MOC solution was designed with industry feedback and best-practices at its core. Mobile accessibility means you can implement and monitor organizational change anytime, anywhere. No matter what the size or complexity of the change you're managing, now you have the ability to keep everyone on the same page -- every step, every stage, every time.

### The Best MOC Solution in the Industry

Complex process changes require the precise coordination and oversight of numerous people and tasks. For those in highly process oriented industries like oil and gas, MOC is not just nice to have, it's a regulatory compliance requirement. Trying to manage it with paper-based systems, spreadsheets, or EHS software that is too complex makes a difficult task even harder.

Ranked as the best MOC solution by a leading third-party analyst firm, our software is designed to simplify complex organizational change while giving you total visibility and control at every step, from concept approval to completion.

With VelocityEHS, you don't have to sacrifice accuracy for efficiency and speed. You owe it to yourself and your employees to find out how much easier and stress-free management of change can be.
