

TRAINING THAT KEEPS UP WITH TODAY'S WORKFORCE

Our comprehensive cloud software solution offers an extensive library of on-demand training courses across a wide variety of EHS topics to help ensure training compliance and employee safety.

Core Capabilities

- Virtual Classrooms
- Nearly 100 Online Interactive Courses
- Administrative Controls
- Customizable Content (PowerPoint, SCORM)

On-Demand Training Made Easy

On-Demand Training gives you access to an array of EHS training courses ranging from HazCom, GHS, and environmental compliance — to emergency planning, exposure prevention, workplace safety and much more. On-demand courses allow employees to learn at their own pace, and feature built-in quizzes to evaluate performance while creating an interactive learning experience that improves training retention.

Our growing library of nearly 100 expert-reviewed courses covering a wide range of EHS and HR training topics, combined with the ability to create and upload your own training content gives your employees the knowledge they need to work safer and smarter — putting you on the fast track to achieving your EHS goals.

In addition to our extensive EHS training library, you get powerful eLearning tools that simplify the tracking, evaluation, and documentation of employee performance, and make it easy to identify training gaps and maintain compliance. In short, VelocityEHS On-Demand Training gives you a centralized, cost-effective way to deploy training across your organization.

The Right Training, Right Now

They say that everyone learns differently. The modern workforce demands cutting-edge training solutions to provide them with the training they need, when they need it, and that accommodates their unique learning styles.

In-person training is expensive, time-consuming and, by itself, often ineffective at providing employees with the knowledge they need to be safer and more productive. Yet, effective training is a core compliance requirement of numerous EHS regulations, and is arguably the single greatest factor in preventing workplace incidents.

Our powerful cloud-based learning management system allows you to deliver training across a variety of EHS topics anywhere, at any time. VelocityEHS On-Demand Training can be implemented as a stand-alone training solution, or as an integral part of your blended training strategy. Engaging and educating your workforce has never been easier.

The VelocityEHS Platform
