The Art & Science of Industrial Hygiene

A comprehensive cloud software solution that helps you assess and control workplace stressors, and maintain a best-in-class IH program.

Core Capabilities

- Survey & Sample Management
- Qualitative Exposure Assessment
- Medical Surveillance
- Chemical & OEL Database
- Laboratory & Consultant Management
- Equipment Tracking & Maintenance

Industrial Hygiene Made Easy

The field of Industrial Hygiene (IH) is at a crossroads. Your need to assess and manage workplace hazards is greater than ever, yet the number of Certified Industrial Hygienists (CIHs) and the corporate investment in support of traditional IH programs have been on a steady decline.

As a result, you may be relying on technicians, safety or other EHS personnel to assist you with managing critical IH functions, or even outsourcing a majority of your program to consultants.

No matter the size of your company, your personal level of expertise, or the maturity level of the IH program you currently have in place, the VelocityEHS IH solution gives you an easy and intuitive way to implement and manage a best-in-class IH program. Its simple design cuts through the complexity of IH tasks and gives you the ability to assess and manage workplace risks across your enterprise in real-time.

A Central Hub for Managing IH

Your IH program requires the coordination of multiple stakeholders, from sampling technicians, CIHs and other EHS personnel, to outside laboratories and consultants. VelocityEHS brings everyone together and ensures the seamless hand-off of responsibilities from one party to another, giving you the visibility you need to manage every aspect of your IH program.

You can send Chain of Custody Forms directly to labs and receive analytical data electronically, right within the software. Other features include a built-in database of CAS Registry Numbers, OELs and laboratories, along with dynamic risk matrices and easy-to-use tools for managing similar exposure groups (SEGs), qualitative assessments, sampling plans, medical surveillance, surveys, samples and equipment.

Whether you're a veteran CIH trying to determine where best to deploy your resources and demonstrate the value of IH when talking with management, or an EHS professional who has inherited an IH program in need of quick improvements, VelocityEHS IH is designed to help you succeed.

Features & Benefits

### Simplify Sampling & Data Entry

- Streamline data entry and reduce errors with auto-fill and pre-built, intuitive templates
- Access built-in chemical & OEL database for quick and easy program implementation and reduced data maintenance
- Automate Chain of Custody submittals and the uploading of analytical data through laboratory interface

Drive IH Program Management

- Develop, schedule and implement a comprehensive IH sampling plan from a single intuitive interface
- Identify your SEGs and perform Qualitative Exposure Assessments to meet your unique IH program needs
- Enroll or remove personnel from medical surveillance programs and track compliance with required medical activities
- Quickly view and update sampling equipment calibration and maintenance status
- Stay on top of regulatory changes with built-in database

Enhance Visibility of Workplace Risks

- Quickly search and determine the status of your qualitative and quantitative IH programs
- Track progress and results with flexible, user-configurable analysis and reporting tools
- Provide visibility and insight into IH programs and success

The VelocityEHS Advantage:

True Cloud Solution

Our products are SaaS, multi-tenant solutions that can be deployed when and where you need them, with no software to download or install.

Helping You Be Better

Eliminate the day-to-day burdens associated with IH sampling, analysis and reporting so you can focus on being a more effective EHS leader.
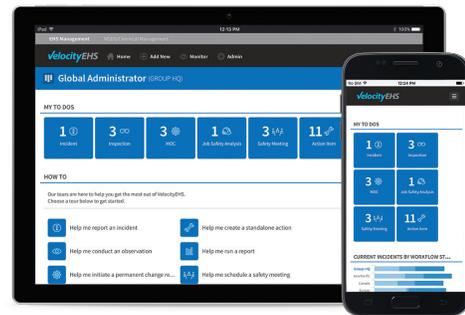

Delivering Value

Designed with continuous feedback and industry insights from customers like you, our solutions are more affordable, quicker and easier to implement, and provide the simplest user experience for you and your employees.

Solving Complex Problems Simply

Our simple design and intuitive user-interface means that you spend less time using the software, and more time focusing on the overall safety of your facilities and your employees.

Providing Personalized Service and Support

Our Industrial Hygiene solution is backed by our expert team of Customer Success professionals who'll give you the individual attention you need to help reach your EHS goals faster.

Well-designed and intuitive solutions that are available across any device via the cloud give you and your employees anytime, anywhere access to the *VelocityEHS* platform.
