

Respirator Fit Test

The Best Fit for Respirator Protection

A cloud software solution that helps you set up and maintain a centralized respirator fit test program, and verify RFT compliance with less effort, time and cost.

Core Capabilities

- Centralized Tracking
- Fit Test Scheduling
- Pre-Loaded Test Protocols
- Qualitative & Quantitative Procedures
- Pre-Test Procedures

Respirator Fit Testing Made Easy

If your workers wear respirators due to elevated exposures to hazardous materials like chemicals, dusts and metal fumes, then respirator fit tests (RFTs) are essential. As part of an effective respiratory protection program, RFTs need to be performed and documented for every worker who wears a respirator, and for every covered respirator type used.

The VelocityEHS Respirator Fit Test solution standardizes the scheduling, documentation and follow up of your RFT activities. It's a powerful platform for managing RFT requirements across multiple locations and large numbers of employees. Easily see which employees use which types of respirators, schedule and assign fit tests, select from pre-built fit testing procedures and record results to easily demonstrate compliance.

Typical testing protocols (like those required by OSHA and others) take 7-8 minutes per employee, and completing paper forms takes another 3-5 minutes. VelocityEHS improves the efficiency of your RFT program with access to the newest OSHA-approved RFT protocols, allowing you to reduce testing time to an average of just 2.5 minutes.

Take Confusion out of RFT Compliance

Respiratory hazards are unique to every workplace, and depending on the types of respirators you use, you may need to apply multiple RFT protocols to demonstrate compliance. So how do you make sure that you're choosing the right protocol for each respirator in your workplace, and that RFTs are performed accurately, consistently, and in compliance?

The VelocityEHS RFT solution includes built-in OSHA-approved testing protocols and a complete library of pre-test procedures that make it easy to select and perform the right RFT protocols for the respirator types used in your workplace.

Whether you're a seasoned EHS professional or new to respiratory protection, our software's simple and intuitive design means that RFTs can be performed with speed and ease. You can have confidence that every RFT at each of your locations is performed according to a standardized and approved protocol, and that workers are receiving the appropriate level of respiratory protection.

The VelocityEHS Platform

Check out all of our EHS management products, including:

- Air Emissions
- Audit & Inspection
- Compliance Management
- Corrective Action
- Ergonomics
- Incident Management
- Industrial Hygiene
- Management of Change
- SDS/Chemical Management
- On-Demand Training
- Performance Metrics
- Risk Management
- Safety Meetings
- Training Management
- Waste Compliance
- Water Quality

VelocityEHS RFT makes it easy to verify compliance with respirator fit test requirements and maintain your respiratory protection program.

Features & Benefits

Time-Saving RFT Capabilities

- Identify workers due/overdue for Right Fit Tests (RFTs)
- Reduce RFT time by average of 60% w/ pre-built protocols
- Save time on training with easy-to-use interface
- Standardize RFT programs across each of your locations

Total RFT Program Control

- Manage RFT schedules & protocols from centralized system
- Verify fit for all types of respirators
- Perform qualitative and quantitative RFTs
- Select built-in pre-test procedures or modify to meet unique RFT needs

Streamlined Regulatory Compliance & Reporting

- Track & document RFT equipment & calibrations
- Eliminate regulatory uncertainty with built-in, OSHA-approved RFT protocols
- Access and search RFT records to demonstrate compliance

The VelocityEHS Advantage

True Cloud Solution

Our products are cloud solutions that can be deployed when and where you need them, with no software to download or install.

Helping You Be Better

Eliminate the day-to-day burdens associated with respirator fit testing so you can focus on being a more effective EHS leader.

Delivering Value

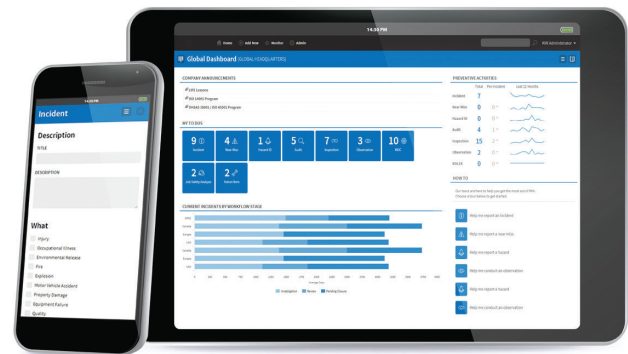

Designed with continuous feedback and industry insights from customers like you, our solutions are more affordable, quicker and easier to implement, and provide the simplest user experience for you and your employees.

Solving Complex Problems Simply

Our simple design and intuitive user-interface means that you spend less time using the software, and more time focusing on the overall safety and health of your facilities and your employees.

Providing Personalized Service and Support

Our RFT solution is backed by our expert team of Customer Experience professionals who'll give you the individual attention you need to help reach your EHS goals faster.

Well-designed and intuitive solutions that are available across any device via the cloud give you and your employees anytime, anywhere access to the VelocityEHS platform.
