

Emergency Response Services

From hazardous material shipping and SDS Section 1 compliance to exposure support and right-to-know SDS access, the VelocityEHS 24-hour Emergency Response Services (**formerly ChemTel**) help keep your employees safe and your business compliant.

Convenient Solutions to Support Your Emergency Response Needs

Shipping Compliance — Receive a 24-hour toll-free number for unlimited use on hazardous materials shipping papers and manifests in order to meet global and domestic regulatory requirements, such as those required by DOT, FAA, IMDG and IATA. Plus, receive a corresponding Certificate of Compliance for your records to help verify your coverage. And in the event of a spill, get access to SDSs and escalated incident reporting to your designated emergency contact.

SDS Emergency Contact Number Compliance — Easily satisfy SDS Section 1 emergency number requirements with unlimited call-in access to our toll-free, 24-hour hotline staffed by chemical safety experts.

Exposure Support — Get on-the-spot chemical exposure support to prevent serious injuries, and even save lives in the event of a chemical emergency. VelocityEHS Exposure Support puts trained specialists with more than 70 years of combined emergency call center experience at workers' fingertips. Toxicologists and medical technicians are on call at all times to provide critical chemical safety information and escalated incident reporting through a convenient hotline.

SDS Rapid Access — Backed by our industry leading MSDSonline database, your employees — global or domestic — get unlimited, 24/7 email or fax access to your company's inventory of safety data sheets through a convenient hotline to help protect employees and ensure compliance with SDS right-to-know, accessibility and library back-up requirements of global hazard communication regulations.

Additional Services — There are even more ways VelocityEHS can help support your emergency response needs, such as **lithium battery shipper support** — which gives you a 24-hour emergency response phone number to meet DOT and all international regulations for battery shipments, preferred pricing on lithium battery shipping labels, and technical and regulatory advice.

Benefits

- **Around-the-Clock Access** — Available to protect employees at workplaces around the world 24 hours a day, 7 days a week.
- **Trusted Expertise** — One of a select few federally and globally recognized Emergency Response Communication Call Centers, providing exceptional and accurate hazardous materials emergency and mitigation support for more than 30 years.
