

REMEMBER WHEN TRACKING AIR EMISSIONS WAS HARD?

A comprehensive cloud software solution that simplifies compliance with emissions inventory, GHG reporting requirements, and major air emission source standards

Core Capabilities

- Real-Time Monitoring and Calculation
- Hybrid Calculation Engine
- Major Source Emissions Compliance, e.g. Title V
- Fully Customizable and Exportable Reporting
- Theoretical Emissions Modelling, e.g. PTE
- TRI Reporting Automation

Air Emissions Management Made Easy

Compliance with air emissions standards can be a logistical nightmare. It requires precise monitoring of every emissions source at each of your facilities, performing countless complex calculations, and maintaining detailed records to demonstrate your compliance.

VelocityEHS Air Emissions is a cloud-based system for recording and analyzing emissions data across your enterprise — performing complex calculations in real-time to give you the most accurate, up-to-date monitoring capabilities available. Our unique hybrid calculation engine lets you create custom formulas, while providing access to a library of industry standard equations. Built-in emissions factor libraries allow you to calculate emissions from virtually any type of fuel or emissions source under a variety of operating scenarios.

VelocityEHS makes it easy to generate and submit Title V permit reports with just a few clicks, and create custom reports to document compliance with emissions inventory requirements, GHG reporting programs and environmental management standards.

VelocityEHS — Reach Your EHS Goals Faster.

Air Emissions Compliance Without the Headache

Managing all of the tasks required for accurate emissions reporting can be an incredible drain on your time and resources. As a result, many companies turn to expensive outside consultants to keep reporting programs running and in compliance.

Systems are available that can automate emissions data entry and compliance reporting, but most are time-consuming to implement and come with a hefty price tag. VelocityEHS gives you powerful monitoring, analysis and reporting capabilities, without the headaches of other systems' more costly, time-consuming and consultant-focused implementation models.

That means you can have our solution up and running faster, and without the need for third-party personnel to operate and maintain your software. It's the fast and easy way to simplify compliance with a wide variety of local, federal and international air quality standards.

The VelocityEHS Platform

Check out all of our EHS management products, including:

- Air Emissions
- Audit & Inspection
- Compliance Management
- Corrective Action
- Ergonomics
- Incident Management
- Management of Change
- MSDS/Chemical Management
- Training & Learning
- Performance Metrics
- Reporting & Dashboards
- Risk Analysis
- Safety Meetings
- Training Management
- Waste Compliance
- Water Quality

VelocityEHS Air Emissions is designed for easy use with your tablet or smartphone, giving you the flexibility to manage every aspect of your compliance anywhere, anytime.

Features & Benefits

Simplified Data Collection

- Automate data entry in real-time with OSISOFT® PI Interface
- Generate custom PDF data collection forms that instantly upload field measurements to your emissions database
- Easily import all of your historic emissions data from your existing systems

Real-Time Monitoring & Calculation

- Map emission units, control equipment and emission sources
- Create custom formulas and access a library of industry standard equations
- Calculate rolling and block sums/averages, PTE, and manage factor changes over time
- Receive alerts when data falls outside accepted ranges or approaches permit limits

Effortless Reporting

- Report Wizard helps you create custom analytics
- Export data to CEDRI/CDX, TCEQ STEERS, and other reporting interfaces
- Automatically transfer data to TRI Form R and export to TRI-MEweb

The VelocityEHS Advantage:

True Cloud Solution

Our Air Emissions solution can be accessed anywhere, anytime, from any mobile device, and our growing list of mobile apps gives you the flexibility to deploy our solutions even when you're offline.

Helping You Be Better

Eliminate the day-to-day burdens associated with emissions monitoring, calculation and reporting so you can focus on being a more effective EHS leader.

Delivering Value

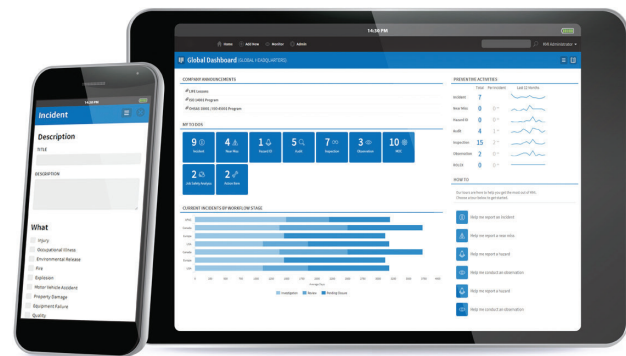

Designed with continuous feedback and industry insights from customers like you, our solutions are more affordable, quicker and easier to implement, and provide the simplest user experience for you and your employees.

Solving Complex Problems Simply

Our simple design and intuitive user-interface means that you spend less time using the software, and more time focusing on the overall safety of your facilities and your employees.

Providing Personalized Service and Support

Our Air Emissions solution is backed by our expert team of Customer Success professionals who'll give you the individual attention you need to help reach your EHS goals faster.

Well-designed and intuitive solutions that are available across any device via the cloud give you and your employees anytime, anywhere access to the VelocityEHS platform.
