

# Industrial Ergonomics Software

## Manage Ergonomics Online

VelocityEHS Industrial Ergonomics is an all-in-one solution for managing workplace ergonomics in non-office environments. By combining online training and assessment tools, expert-led site improvement events, and a powerful management database, your organization will have everything necessary to deploy, monitor, and manage the ergonomics process, from one to hundreds of locations.

## Our Sustainable 3-Step Approach

### LEARN

Online Training

### DO

The Job Improvement Process

### MANAGE

Data and Reporting

## Build knowledge quickly

Online training modules, available in multiple languages, cover everything from principles of ergonomics to design guidelines.

## Gain skills to fix jobs

Once the online training is finished, your teams will work alongside our board-certified professional ergonomists to assess and improve problem jobs.

## Verify and track progress

Ergonomics process owners can easily monitor the activities of the ergonomics team, track the status of improvement plans, and generate reports.

## Why VelocityEHS Ergonomics?

- **Smarter assessments with A.I.** New sensorless motion-capture technology harnesses artificial intelligence to quickly capture real-time assessment data with the camera on any mobile device.
- **Consistent.** On-demand e-learning provides up-to-date content whenever and wherever you need it. Our proprietary assessment tools ensure a simple, common way to measure risk.
- **Quick to implement.** Cut classroom time in half. The unique combination of online training and expert-led improvement events helps your team build knowledge and skills quickly.
- **Visible.** The easy-to-use, highly-visual system includes scoring and reporting tools to share enterprise-wide data and highlights trends.
- **Engages many.** The participatory process involves many, from shop floor ergonomics teams, to managers, to leadership.
- **Data-driven.** Easily categorize issues to push the ergonomics process upstream and “design out” the risk of injury.
