

Industrial Ergonomics Services

Dedicated Support for a Comprehensive and Efficient Process

VelocityEHS Industrial Ergonomics, an all-in-one software solution for managing workplace ergonomics in non-office environments, can be paired with support from our team of industry experts to assist your organization with everything necessary to deploy, monitor and manage the ergonomics process, from one to hundreds of locations. Whether your team is made up of one or many, our large team of board-certified ergonomists have the tools and training to support your needs to do ergonomics right.

INDUSTRIAL ERGONOMICS TRAINING COURSES

Our wide selection of ergonomics training courses will give you and your team the skills and knowledge needed to support and sustain a robust ergonomics process. Virtual and in-person options are available.

WORKPLACE ERGONOMICS ASSESSMENTS

If you lack the time or resources to conduct ergonomics assessments yourself, leave it to one of our certified professional ergonomists. We can help build your risk map, identify areas of concern, and brainstorm improvements to ultimately reduce musculoskeletal disorder risk. Virtual and in-person options are available.

CONTINUOUS IMPROVEMENT EVENTS

Using a kaizen-style model, these events are designed to achieve rapid implementation of ergonomics solutions in industrial environments.

ON-DEMAND CONSULTING

We offer full-service ergonomics consulting customized to your needs. Our services include product and workstation design reviews, gap analysis, standards and guidance creation or review, audits, and more. Virtual and in-person options are available.

MANAGED SERVICES

For those who have (or want to build) their ergonomics program, but don't have the resources or expertise, we can support your company with full- or part-time program management to make sure your process is effective, sustainable, and successful. Virtual and in-person options are available.

According to the Liberty Mutual Workplace Safety Index, overexertion injuries are the **#1 cause of non-fatal workplace injury** in the U.S., **costing companies over \$13.79 billion**. Our ergonomists have extensive experience in launching and sustaining world-class ergonomics processes to keep your workplace safe, and achieve higher productivity and product quality.

Simple – Ergonomics tools and training that are designed to be used by a wide range of employees in various industries.

Data-driven – Prioritize resources and make decisions based on real-time, comprehensive reports and charts.

Professional – Our team of board-certified ergonomists, the largest in North America, has decades of industry experience.

Supported – Backed by a customer experience team, you'll have answers to whatever you need when you need it.
