

Respirator Fit Test

The Best Fit for Respiratory Protection

A cloud software solution to help you set up and maintain a rigorous, centralized respirator fit test (RFT) program, and verify RFT compliance with less effort, time and cost.

Core Capabilities

- Standardized RFT Tracking
- Pre-Test Procedures
- Fit Test Scheduling
- Qualitative & Quantitative Testing
- Pre-loaded Test Protocols

Respirator Fit Testing Made Easy

Respirator fit testing is at the heart of respiratory protection. After all, if respirators don't fit, they provide little or no protection for workers. That's why regulations like OSHA's Respiratory Protection Standard require employers to perform and document fit tests for every worker who wears a respirator, and for every covered respirator type used in your workplace.

The VelocityEHS Respirator Fit Test solution standardizes the scheduling, documentation and follow up for all of your RFT activities through a single, easy-to-use software platform. You can quickly document which workers use each respirator type, schedule and assign fit tests, select from pre-loaded test protocols and procedures, and record test results to easily verify compliance across your entire organization.

Normally, RFT protocols (like those required by OSHA) can take as much as 7-8 minutes per worker, and documenting test results using paper forms takes an additional 3-5 minutes. VelocityEHS improves RFT efficiency by allowing you to quickly select from OSHA-approved protocols and document results using pre-built data collection forms, reducing total test times to just 2.5 minutes.

Take Confusion out of RFT Compliance

Respiratory hazards are unique to every workplace, and depending on the types of respirators you use, you may need to perform multiple RFT protocols to ensure compliance. So how do you make sure that you're choosing the right protocols for each respirator in your workplace, and that tests are accurate, consistent and in compliance?

The VelocityEHS RFT Solution features pre-loaded OSHA-approved testing protocols and a complete library of pre-test procedures that allow you to simply select and perform the right RFT protocols for the respirator types used in your workplace.

Whether you're a seasoned EHS professional or new to respiratory protection, our simplified design means that RFTs can be performed and documented faster than ever before. You can be confident that every RFT at each of your locations is performed according to approved protocols, and that workers are receiving the highest level of respiratory protection available.

The VelocityEHS Platform

Check out all of our EHS management products, including:

- Air Emissions
- Audit & Inspection
- Compliance Management
- Corrective Action
- Ergonomics
- Incident Management
- Industrial Hygiene
- Management of Change
- SDS/Chemical Management
- Training & Learning
- Performance Metrics
- Risk Management
- Safety Meetings
- Training Management
- Waste Compliance
- Water Quality

The VelocityEHS RFT Solution makes it easy to ensure workers get the right fit for respiratory PPE - helping you verify compliance with respirator fit test requirements and maintain an effective respiratory protection program.

Features & Benefits

Time-Saving RFT Capabilities

- Standardize RFT programs across each of your locations
- Identify workers due/overdue for RFTs based on respirator type
- Reduce test times by an average of 60% w/ pre-loaded RFT protocols
- Get your RFT program up and running fast with little or no user training required

Total RFT Program Control

- Manage RFT schedules, protocols and results from a single, centralized system
- Verify proper fit for all types of respirators
- Perform qualitative and quantitative RFT protocols
- Select from built-in pre-test procedures or customize to meet your unique RFT requirements

Streamlined Regulatory Compliance & Reporting

- Eliminate regulatory uncertainty with built-in, OSHA-approved RFT protocols
- Query and export RFT results, equipment and calibration records
- Quickly search and filter RFT records to demonstrate compliance

The VelocityEHS Advantage

True Cloud Solution

Our products are cloud solutions that can be deployed when and where you need them, with no software to download or install.

Helping You Be Better

Eliminate the day-to-day burdens associated with respirator fit testing so you can focus on being a more effective EHS leader.

Delivering Value

Designed with continuous feedback and industry insights from customers like you, our solutions are more affordable, quicker and easier to implement, and provide the simplest user experience for you and your employees.

Solving Complex Problems Simply

Our simple design and intuitive user-interface means that you spend less time using the software, and more time focusing on the overall safety and health of your facilities and your employees.

Providing Personalized Service and Support

Our RFT solution is backed by our expert team of Customer Experience professionals who'll give you the individual attention you need to help reach your EHS goals faster.

Well-designed and intuitive solutions that are available across any device via the cloud give you and your employees anytime, anywhere access to the VelocityEHS platform.
