

Incident Management Software

We Make it Easy for Everyone to Prevent Incidents

Part of the VelocityEHS Safety Solution

As an EHS professional, you can't afford to simply react to workplace injuries and illnesses — you need to anticipate and prevent them before they occur.

VelocityEHS Incident Management is an essential tool for any proactive safety program. Easily report, manage, and analyze everything from minor hazards to major accidents, all in one centralized system. Whether on or offline, your team can effortlessly capture crucial incident data, enabling thorough trend analysis and ensuring compliance with regulations like OSHA and RIDDOR.

The end result? By providing users with the ability to easily view relevant EHS information across an organization, risk management becomes centralized and simple — and you get time to focus on other important business and life objectives.

Core Capabilities:

- + Incidents
- + Near misses/hits
- + Hazard identification
- + Root-cause analysis
- + Corrective actions
- + Reporting & trend analysis

Features & Benefits

VelocityEHS Incident Management helps prevent incidents and control risk through greater visibility of your incident data.
